Subject: Unsolicited Electronic Message

28/02/2006 07:45 PM

Dear Sir

PRIVATE AND CONFIDENCE

Please don't disclose my data without my consent

After long long time, HKSAR Government take action for this matter

For Junk Fax

Our boss always complain why we don't call the advertiser to stop the Junk fax and register to refuse all incoming advertisement fax. Although we did both, the junk fax come with similar name and the volume is duplicated after a few months. The advertiser will ask you fax the refuse letter directly from your fax machine, otherwise they will not accept it. Unfortunately their fax is always busy or data cannot be transferred after connection. Our Management forward their fax to office to avoid missing fax, we cannot fax the refuse letter with these fax line. Finally junk fax is non-stop.

For Telephone and Mobile Phone

We shared a stored value sim cards for China trip and do not tell anybody except our family, but advertisement by voice mail or salesmen can reach you without any problem. Our Sales Manager waste his money and sleeping time during his overseas trip. These calls may show phone number which are directly form business phone system which can only dial out, or you have only the choice to press some key to accept their service without any key for refuse.

The aged and baby of our family are going to bed so early, but they cannot sleep well due to these calls.

All these unsolicited electronic message must be under control, we cannot always influence by these calls.

Although the advertiser complain it will affect their business, our rights cannot be attacked too. All members of our family will fully consent and support to control it immediately.

Central listing by HKSAR Government is a must otherwise we need to inform the advertiser one by one which is wasted our money and time.

Thanks
