Subject: spam consultation paper

24/01/2006 17:16

With regard to the consultation on electronic SPAM messages. What is your office's proposal in dealing with unsolicited promotional/advertising phone calls to mobile phones?

As mobile phone charges are charged by the usage time. We the users are in effect paying for these unwanted calls. I regard such calls as tantamount to stealing. Shouldn't your office be looking into ways to curb this problem as well? Perhaps allowing for the introduction of charges-per-call for all fixed line telephones?

As regards to your consultation paper, I think it is a step in the right direction. Hope the legislation can be passed ASAP.

Yours sincerely,  
H.P.Yau
